Artificial Plants & Trees Brochure

Installation of Natural Trunk Palms, Topiary and Pandanus

FICUS LONGIFOLIA • FEATURE STEMS • CAPENSIA • JAPANESE MAPLE • DRACAENA REFLEXA • PODOCARPUS
IA • FRUIT TREES • NATURAL BAMBOO • BAMBOO BUDDHA • JAPANESE BAMBOO • ORIENTAL BAMBOO

Our **Natural Trunk Trees** range is a craftsman's selection of pre-assembled shrubs and trees up to 3-metres tall originally intended for indoor landscaping. Today, the range is increasingly used outdoors, and in large public spaces under cover with plentiful sunlight. Some deployments have been in-situ for many years and remain as lustrous and full-coloured as the day they arrived.

FIREsilx™ inherently fire retardant artificial foliage for indoor use enhances our range of standard artificial foliages on natural timber trunks creating **realism inspired by nature.**

REPORT OF EXAMINATION

AMTAC

SUBJECT: Three Pieces of Foliage

DESCRIBED AS:

- 1) Variegated green leaves
- 2) Dark Green/Red leaves
- 3) Dark Green/Light Green leaves

TEST REQUESTED: Resistance to ignition by smouldering ignition source (cigarette) and small gas flame (match equivalent)

RESULTS

Ignition Sources 0 (cigarette) and 1 (gas) as defined in BS.5852:1990 were applied directly to the leaves.

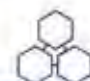

The following tests relate only to the ignitability of the combustion of materials under the particular conditions of test; they are not intended as a means of assessing the full potential fire hazard of the materials in use.

<u>Ignition Source</u>	<u>Observations</u>										
<u>Variegated leaves</u>											
0 (cigarette)	No flames, smoke or smouldering were observed										
1 (gas)	<table border="0" style="width: 100%;"> <thead> <tr> <th colspan="2"><u>Time to Extinction, secs</u></th> </tr> <tr> <th><u>Flames</u></th> <th><u>Smoke</u></th> </tr> </thead> <tbody> <tr> <td>i) Nil</td> <td>5</td> </tr> <tr> <td>ii) Nil</td> <td>10</td> </tr> <tr> <td colspan="2">No smouldering</td> </tr> </tbody> </table>	<u>Time to Extinction, secs</u>		<u>Flames</u>	<u>Smoke</u>	i) Nil	5	ii) Nil	10	No smouldering	
<u>Time to Extinction, secs</u>											
<u>Flames</u>	<u>Smoke</u>										
i) Nil	5										
ii) Nil	10										
No smouldering											
<u>Dark Green/Red leaves</u>											
0 (cigarette)	No flames, smoke or smouldering were observed										
1 (gas)	<table border="0" style="width: 100%;"> <thead> <tr> <th colspan="2"><u>Time to Extinction, secs</u></th> </tr> <tr> <th><u>Flames</u></th> <th><u>Smoke</u></th> </tr> </thead> <tbody> <tr> <td>i) 1</td> <td>5</td> </tr> <tr> <td>ii) Nil</td> <td>5</td> </tr> <tr> <td colspan="2">No smouldering</td> </tr> </tbody> </table>	<u>Time to Extinction, secs</u>		<u>Flames</u>	<u>Smoke</u>	i) 1	5	ii) Nil	5	No smouldering	
<u>Time to Extinction, secs</u>

AMTAC

AMTAC

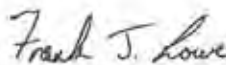

Conclusion

From the tests carried out the three samples of foliage submitted comply with the flammability requirements of the tests of BS 5852, since none of the samples showed excessive burning and no smouldering.

Comment

BS 5438 test is designed for testing the ignition of fabric samples and cannot be applied to the actual samples of foliage of the type we received because of the size of the test pieces involved.

The results of the examination refer only to the samples submitted and do not guarantee the bulk of the items from which the samples were obtained to be of equal quality.

 Authorised Signatory
Frank Lowe

Topiary Shapes (Pre-made)

Our pre-made topiary is supplied in a variety of classical shapes inspired by locations such as the Gardens of Versailles.

These fully pre-assembled, off-the-shelf and boxed topiaries can be supplied as-is, or they can be customised with stems or mounted into planters before despatch to you.

Most of our topiaries offer the variation of FIREsilx™ inherently fire retardant foliage for indoor safety, or UVsilx™ sunlight-resistant colourfast for outdoor use.

We also offer topiary mats for covering your own shape forms and walls, lending infinite possibility to your projects.

Plants & Underplanting

Our extensive ranges of plants and underplanting provide everything you need to recreate English country gardens, jungle settings, and high sierra desert outcrops ... and much much more.

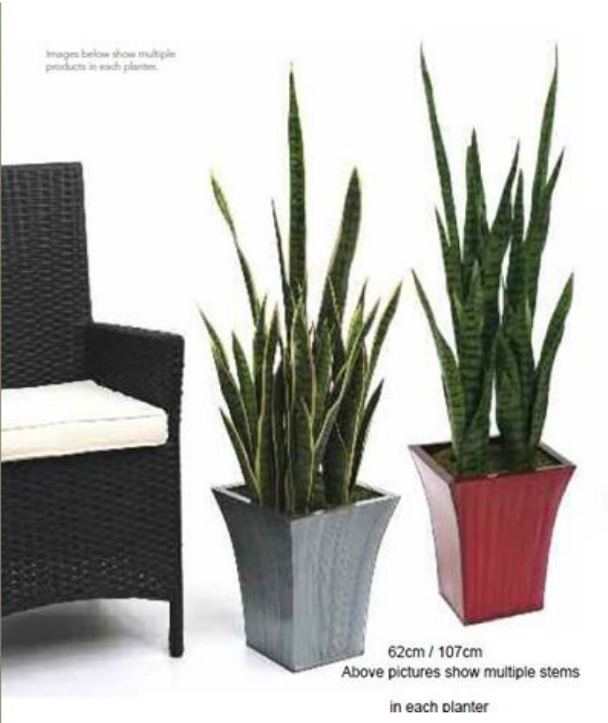

Bring the colourful and exotic to your indoor and outdoor landscaping and planting, or express conservatism with traditional favourites.

Whichever setting or style you choose, there's also an extensive choice in our fire retardant or sunlight resistant FIREsilx™ and UVsilx™ options.

CONTRACT, BESPOKE AND PREMIER BESPOKE

In this section you will find...

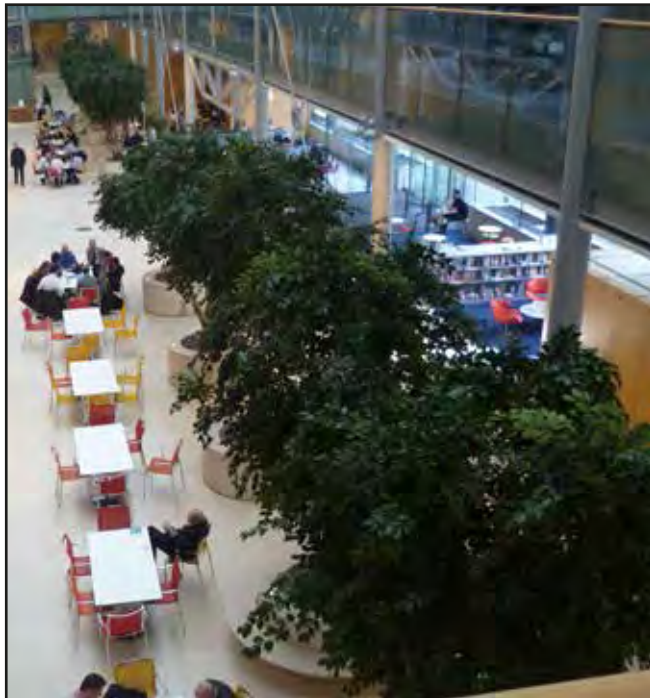

LARGE SPECIMEN TREES CONTRACT COLLECTION • SPECIMEN BESPOKE TREES •
THE FABRICATE RANGE • FABRICATED HANDPAINTED RESIN TRUNKS • OLIVE TR

BESPOKE & CUSTOM-MADE

With almost 20 years experience of providing **bespoke landscaping solutions**, our client portfolio includes amusement parks, architects, building developers, decorators, designers, events & facilities managers, florists, garden centres, hotels & hospitality organisers, museums, palaces, screen and stage production companies, shop pub & office fitters, sports & leisure centres, theme parks and watersports centres.

Our dedicated and meticulous design team liaise with you throughout the planning process, then supervise our in-house artisans manufacturing to your exact specifications with meticulous attention to detail. On completion, our experienced logistics team ensure correct and timely delivery worldwide utilising bespoke transport solutions appropriate to your products.

The production of your bespoke products is achieved using a mix of traditional hand-made craftsmanship and the latest technologies from CAD/CAM-controlled form cutting to the most modern coatings applied by skilled technicians.

Custom-made artificial trees remain our most popular speciality product range. Now available in traditional natural timber trunks (NTT) and in a variety of fabricated trunk materials (FTT).

Our steel-cored, full height palm tree varieties, built with preserved palm-husk trunking and preserved fronds, simply cannot be beaten for realism - so much so that the Middle East and North Africa continues to be a key market for them.

Our FIREsilx™ inherently fire retardant artificial foliage is renowned worldwide for its high safety factor. UVsilx™ fade-resistant exterior grade foliage is another of our brands that grows in popularity, with increasing numbers of ranges becoming available.

Multi-stemmed narrow trunks built as Ficus trees.

Triple-stem "X-frame" trunk with Olive foliage.

Some of our many barks' colour & texture finishes.

Bespoke Fabricated Trunk Trees

Having built artificial trees with pre-made fabricated trunks & stems for many years, we decided in 2012 to invest in creating our own production facility to craft and reproduce the core frames onto which our foliage are assembled. Now, using our own latest state-of-the-art facilities, and staff who have been trained by film industry special effects professionals, we produce truly lifelike artificial trees, to the dimensions and scale your projects demand.

The range of bark finishes and textures, and the list of tree frame shapes and styles that we are able to replicate grows weekly. From slender and elegant coppiced Silver Birch, to stout mature Oaks and Olives, we can build the trees for you ... and you'll be able to rest easier knowing that the correct choice of fire or sunlight retardant foliage is applied for your indoor or outdoor placements.

The long, the short, and the tall, right side up, and suspended upside down, solid trunk, and hollowed out for actors to perform - we've made them all ... so don't let nature control your plans, let us make nature for you, and create your own wonder world today.

(Above 6 photos) Trees from various projects show the story of fabricating the tree trunk.

In all its glory, a finished full-size fabricated Olive tree.

Bespoke Natural Timber Trees

Our original bespoke range and still the most popular, based on the ever growing repeat customer list who buy them.

Hand-built using natural wood stems and branches, with an array of species-specific foliage, with or without fruit, with a choice of base options from simple travel boxes, to steel base plates for bolting to the floor or ground, to pre-installed in appropriately sized planters.

Choose FIREsilx™ inherently fire retardant foliage for indoors, and UVsilx™ sunlight resistant fade-proofing for outdoors.

Bespoke trees can be built to any shape you want; from slim and elegant columnars to broad canopy, umbrella-like, woodland spreads. The more detail you give us for your requirements, the more closely we can match them.

Product: 3m Mountain Gum built on Natural Stems (TLGUM)
Planter: Bayon Range (M/BAYON60)

Product: 2m Black Olive built on Natural Stems (TLBOLIVE)
Planter: Cuenca Range (M/CUENCA50T)

Columna Range

These tall natural looking trees are ideal for breaking up and softening large areas.

Pots shown are not included unless specified. The above products are all constructed using Fire Retardant Foliage. All products shown in this section are examples only. Please note that we build bespoke trees to clients specification. For a full range of leaf types available see our Foliage Library on page 36.

Product: Bamboo Poles
Speckled, Standard and Black

Product: Black Bamboo (TL300/3.5m)
Planter: Bayon Range (M/BAYON50)

Product: Standard Bamboo
Planter: Bespoke

Bamboo

Available on a variety of different stems. Three foliage types available. Heights up to 15m.

Pots shown are not included unless specified. The above products are all constructed using Fire Retardant Foliage. All products shown in this section are examples only. Please note that we build bespoke trees to clients specification. For a full range of leaf types available see our Foliage Library on page 36.

For all topiaries we offer a choice of craftsman-cut wood frames, or CAD/CAM-produced foam cores. Both styles offer long-lasting indoor and outdoor strength once coated and painted.

Bespoke Topiaries

Let your imagination run wild with our bespoke topiary range. If you can draw or sketch what you're thinking of, we can probably make it.

Popular subjects for our individualised topiaries include company names and logos, geometric shapes, objects symbolic to a company's operations, and seasonally-themed display decor.

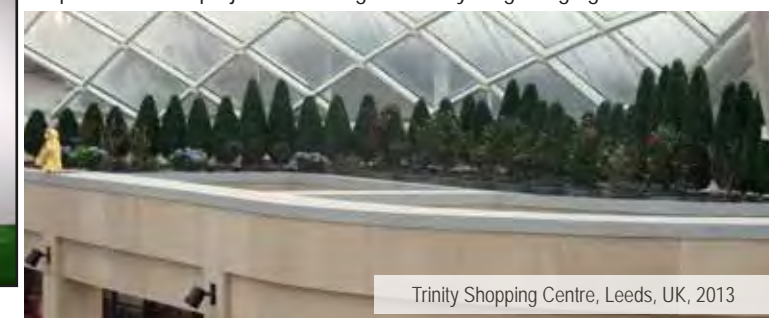

Our assorted Rapid-Prototyping facilities combine to enable "one off" bespoke builds such as the Stag's Head above

Large-batch bespoke topiaries have included building a forest of tear-drop shaped trees and projects involving extremely long hedging runs.

For larger orders that allow "production runs" we can return high throughput with high quality and consistency, despite the artisan nature of each stage.

Trinity Shopping Centre, Leeds, UK, 2013

Acuba shrub as screening in large terracotta planters.

(Top) Regular Box hedging topped with custom-made topiary acorns (Above) Buxus hedge in planter.

(Top & above) Buxus hedge walls at a London Pub.

Bespoke Hedges & Screening

Probably the most popular of our bespoke ranges is custom-made box and buxus hedging. Pairing this with more open foliage to create privacy screening, sun shading, or wind breaks increases the installations' presentation and value.

Both clipped hedging and informal screening can be built in planters or as freestanding assemblies for either repositioning or fixing to the ground surface. All of the foliages we recommend for hedging and screening are available in FIREsilx™ and UVsilx™ varieties.

Combining the regular shaping of box and buxus hedging with bespoke or standard topiary shapes brings a new range of possibilities for delivering truly unique solutions, and of course a very real advantage is that artificial hedging can be used where living hedge cannot be planted or could not survive.

Four views of a major installation of UVsilx™ planting comprising Giant Bamboo screening, Buxus hedging, and Bush Ivy, on a rooftop in Paris.

(Top) Mixed planting bespoke window & floor troughs. (Above) Custom-made Grass Screening in-situ in Dubai

Bespoke Arrangements & Troughs

There's no standard format for our bespoke and custom-made plantings in planters, pots, troughs, urns and other containers. Sometimes, as in the grass screening shown above right, the building or environment is the plants' container. We can (and do) create bespoke "standard ranges" for large resellers, which we then produce by the shipping container load, repeatedly over several seasons. We also custom-make planters as well as the arrangements within them, such as in the on-site photo below.

Whatever your needs, call our bespoke design team to discuss the best way in which we can assist your project to be delivered on time & budget.

(top left) Cyclamen & Box in Swag trough, (top right) mixed plants in Rattans, (bottom right) Pansies & Box in Adam trough, (bottom left) more Rattans mixers.

(Above four photos) Test assembly of bespoke green-wall panels for a prestigious London department store's installation

(Above four photos) Final installation of bespoke "green" walling at a new London restaurant in 2012

Green-walls & Panels

Plant-covered "green walls" no longer need to offer the choice of just ivy or ivy.

In addition to the innovations in living green wall technologies, artificial plant panels, and constructs, now allow any location to reflect the touch of nature. It's no longer necessary to plant exclusively in the form of trailing plants cascading from a ledge - now you can clad entire walls or even ceilings in greenery, or any other colour you choose.

With strict safety regulations applying to most elements of interior fitting, our FIREsilx™ inherently fire retardant foliages are the natural choice for building regulations compliance. Outdoors, our UVsilx™ will keep your walls covered in verdant foliage for many years. And with the breadth of our plant and foliage collections, no two walls need ever be the same again.

All our green-walling is fully made-to-order from your specifications.

(Top) Grape Ivy panel, (above) Exterior Ivy panels in-situ.

(Top) Mixed plants panels create a canopy, (above) Jungle Mix panel.

**Click here to visit our “Grasses Flowers & Still Life webpage”
& view our full “Grasses and Rushes Brochure” on that page**

Ornamental grasses for indoor and outdoor use where a touch of formality is needed to keep things smart.

A variety of grass types is available, each in assorted lengths and colours. For meadow-style planting, several options with seed heads and additional broadleaf plants are included.

Grasses and rushes display best in non-complex plantings using smooth sided planters in neutral colours. Rushes are invaluable for adding height with a small footprint, and often used in alcoves and room corners.

Our grasses and rushes collection varies constantly, therefore the examples shown in this section may change several times per year.

Grasses & Rushes

<u>Product Code</u>	<u>Product Description</u>	<u>Pack Qty</u>
GRS20	Prograss Premier 20mm	1
GRS35	ProGrass Premier Lux 35mm	1
GRS11	ProGrass Prime 11mm	1

From exhibition halls and parks to household gardens to professional sports pitches, PROgrass™ is the artificial turf of choice for long-lasting and hard-wearing applications.

Available in a choice of grass heights, with varying “roughness” grades giving the impressions of close-trimmed through to natural unevenness.

Colourfast and UV-stable, PROgrass remains verdant for many years and it’s natural weed-blocking capability further reduces maintenance.
