Natural Trunk Trees

Our natural trunk tees range is a craftsman's selection of pre-assembled shrubs and trees up to 3 metres tall originally intended for indoor landscaping. Today, the range is increasingly used outdoors, and in large public spaces under cover with plentiful sunlight. Some deployments have been in-situ for many years and remain as lustrous and full-coloured as the day they arrived.

FIREsilxTM inherently fire retardant artificial foliage for indoor use enhances our range of standard artificial foliages on natural timber trunks creating realism inspired by nature.

Topiary

Our pre-made topiary is supplied in a variety of classical shapes inspired by locations such as the Gardens of Versailles.

These fully pre-assembled, off-the-shelf and boxed topiaries can be supplied as-is, or they can be customised with stems or mounted into planters before dispatch to you.

Most of our topiaries offer the variation of FIREsilxTM inherently fire retardant foliage for indoor safety, or UVsilxTM sunlight-resistant colourfast for outdoor use.

We also offer topiary mats for covering your own shape forms ad walls, lending infinite possibility to your projects.

replica buxus hedging

Beautifully constructed replica Buxus hedging made using only composite frames and stainless steel pins for unbeatable longevity.

Des buis (Buxus) en haies artificielles soigneusement fabriquées en utilisant des cadres en fibre de verre et résine et des broches en acier inoxydable pour assurer une grande longévité.

low hedge / high planter

Our hedges can be manufactured in any height, width or length and to fit any planter, including curved and are suitable for both outdoor and indoor use. Order pre fitted to planters and have the whole job delivered to site for final placement.

UV resistant, weather resistant, removable for repair off site. Can be supplied in lengths for seamless joining to make runs of any size.

feature green wall

Based on a 50cm x 50cm grid, this stunning replica Greenwall can be specified in one of our standard interior or exterior plant mixes or a unique mix created using the Greenwall plant toolkit below. Logos, pictures and other features can be mixed in for an incredible display. See www.livingreendesign.com for the full Feature Wall brochure.

Dapple: All finishes.

See page 275 for all colour and finish options.

Code	
FWALL1	1000 x 400 x 1200mm
FWALL2	1000 x 400 x 1600mm
FWALL3	1000 x 400 x 1800mm

All available as an option with castors.

1 sided option :-
- can apply logos/graphics on reverse

2 sided option:-
- can have all of one foliage
- can have mixed options as page 13

Hand-built
Standard Greenwall Panels

Mixed flower and foliage types, in the most popular collections, for maintenance-free vertical gardens and space dividers.

Please note that our bespoke production department can create panels in any size or shape to meet your project needs. For many years we have custom-built mosaic and jigsaw style collections for covering irregular-shaped and very large surfaces.

Our greenwall panels use FIREsilx™ or UVsilx™ flowers, foliage and plants. Custom collections can be applied to suit your interior and exterior projects.

All Greenwall prices
are per square metre

Grasses & Rushes

Ornamental grasses for indoor and outdoor use where a touch of formality is needed to keep things smart.

A variety of grass types is available, each in assorted lengths and colours. For meadow-style planting, several options with seed heads and additional broadleaf plants included.

Grasses and rushes display best in non-complex plantings using smooth sided planters in neutral colours. Rushes are invaluable for adding height with a small footprint, and often used in alcoves and room corners.

Our grasses and rushes collection varies constantly, therefore the examples shown in this section may change several times per year.

Plants & Underplanting

Our extensive ranges of plants and underplanting provide everything you need to recreate English country gardens, jungle settings, and high sierra desert outcrops... and much, much more.

Bring the colourful and exotic to your indoor and outdoor landscaping and planting, or express conservatism with traditional favourites.

Whichever setting or style you choose, theres also an extensive choice in our fire retardant or sunlight resistant FIREsilxTM and UVsilxTM options.

Four Seasons Hotel, Bahrain, one of 17 full-size reproduction Olive trees designed, produced, and installed

Premiere Bespoke

For almost 20 years, we have been supplying the interior landscape industry with custom-made reproduction trees using a combination of preserved natural trunks and branches with artificial foliage in either inherently fire retardant or UV and fade resistant materials.

With requirements specified by architects, designers, and landscapers, our Bespoke Production teams make to order the trees and shrubs required for prestigious and modest projects alike.

Specialist fabrication units, such as our CADCAM CNC room and the moulding, casting and coatings bay supported by the fully trained metal fabricators prepare the structural frameworks, which are then hand finished by skilled artisans before being foliated by our highly experienced tree builders.

Stunningly realistic and inspired by nature are hallmarks of our Premiere Bespoke custom-made trees and shrubs.

Lansdowne House, London, UK

Replacement of pre-existing 7-metre and 13-metre Washingtonia palm trees with under planting, to multiple locations within a courtyard lobby zone.

Steel tube cores overlaid with preserved natural palm husks and topped with preserved natural Washingtonia fronds - all with FIREsilx fire retardancy treatments.

Wellcome Trust, London, UK

An avenue of natural trunk artificial trees within the glass-rooved central plaza of an international headquarters of this major pharmaceuticals manufacturer.

Extra large bespoke planters, in a complementary finish to the interior decor, provided the base specifications for this row of 5-metre ficus trees. Design intent was to project a boulevard atmosphere, with cafe dining along a large stretch of the plaza.

GEMS Wellington Academy, Dubai

Provide natural softening and focal points within a large ultra-modern and minimalist reception foyer. Features to be tasteful & stylish without overpowering the space.

Two preserved olive tree trunks with natural branches and artificial foliage bearing artificial olive fruits, mounted into structural planters with seating surrounds. Under-canopy height set to prevent overhead obstruction to visitors, whilst keeping natural proportions to the trees.

Four Seasons Hotel, Bahrain

Five and seven metres, preserved trunk, olive trees in an avenue from the exterior drive-in through the reception lobby onto the exterior lobby terrace.

External trees with UVsilx foliage and internal trees with FIREsilx foliage and fruits. A number of engineering challenges involving baseplates, mounting stands, and hidden lightingc onduits were overcome with direct liaison between Tree-Locate's drawing office and the project architects, designers, and managers.

Stobo Castle Spa, Peebles, UK

Centre-piece feature tree in a glass-roofed lounge area, with poly-resin artificial trunk and main limbs, preserved secondary branches, and FIREsilx foliage.

Canopy top and bottom heights were subject to strict control due to limited space available at the installation point. The tree was delivered as modules with final assembly on-site.

House of Curry, Jumeirah Beach, Dubai

Three giant broadleaf trees installed to two sites within separate malls in Dubai. These trees were purpose built to enclose and mask structural support pillars.

Trunks were constructed as a whole with foam and bark coatings over a multi-upright steel skeleton, then split vertically for encasing the pillars. Main branches used the same construction with engineered attachment points. Limbs & canopy were flush-fitting to ceilings whilst spreading over dining areas like a parasol. Final assembly & finishing in-situ.

Nokia, Telecoms Expo 2014, Spain

Centrepiece and promotions visual aid tool, at the centre of Nokia's expansive display area in Barcelona. Widespread equidistant main limbs to bear loading of promo aids.

Shown here during final installation, the tree measured 5.5-metres tall with a 12-metre canopy spread (FIREsilx foliage). Frame of steel tubular modules with fire retardant bulking and barking. Shipped in modules, with final finishing in-situ after the main assembly completed.

Harrods, London, UK

Create a forest avenue of Silver Birch trees for the Christmas Grotto and window displays. Light weight and fire retardancy a primary concern in the design plan.

After taking moulds from live Silver Birch trees, the faux trunks were created with lightweight fire retardant pouring foam. Canopy branches utilised fire resistant Manzanita branches, with the finished trees hand-painted to natural winter colouration for the species. The typical appearance of Silver Birch makes it a popular style for Winter and Christmas displays.

Heron Tower, London, UK

Large expanse of wall covered with FIREsilx mixed foliages on steel mesh panels to exact dimensions and specifications of interior landscape designer.

Delivery of this project required coating standard foliage types in a bespoke colouration for the client's colour scheme before mounting to the mesh panels. Each of the mesh panels had to be made to align with precise mounting points specified in the design plans.

Basement Night Club, Dublin, Ireland

Several floral themed foliage panels for deployment as wall decor in the lobby and foyer areas. Inherent Fire Retardancy was paramount for this project.

Steel framed panels with corrosion-preventing electro-plated mesh formed the backing for a luxurious assortment of FIREsilx flowers and foliage in a random arrangement. Selected plants included both country garden and woodland species, as well as clumps of evergreen conifer ... all artificial.

Harrods, London, UK

A "Winter Garden" green wall of mixed foliage to cover an alcove and surround a doorway below a staircase in the main store.

A sectional greenwall of steel mesh panels to meet exact dimensions and shapes provided by the landscape designer. All plants were from the FIREsilx range with colour arrangement as per the designer's visualisations.

Stock Grape Vine / Ivy Panels & Mats

An unusual range of foliage mats designed for covering expanses of wall without the expense of bespoke steel-frame panels to support them.

These panels also provide strong privacy between restaurant seating when used with low-cost garden trellis as a support frame.

Styles available in FIREsilx and UVsilx options vary.

Berkeley Hotel, London, UK

Complete new install from plans and designs, converting a sunken rooftop section to a sun garden at this long-established central London hotel.

PROgrass artificial turf, UVsilx boxwood hedging, and assorted UVsilx artificial bushes, shrubs, and trees in planters were supplied to a tight design specification. UVsilx artificial flowering climbers on trellises completed the setting.

Chelsea Creek Apts., London, UK

Complete new install for the penthouse terraces of a new luxury apartment building in London adjqacent to the River Thames.

Long runs of UVsilx buxus hedging were variously set into planters, onto stub-walls, and onto the terraces' floors. Preserved trunk ancient olive trees with UVsilx foliage and preserved natural branches provided feature points, complementing the many items of UVsilx boxwood and both bespoke and standard buxus topiaries.

16e Arr, Paris, France

New install for newly refurbished mansion home in the prestigious 16th Arrondissement opposite the Eiffel Tower and situated in elegant 18th & 19th century streets.

The installation comprised of 5-metre UVsilx bamboo trees providing screening from the buildings opposite, UVsilx buxus hedging custom built to all parapet edges including curves, and UVsilx trailing ivy bushes to soften rain ledges.

Trinity Centre Mall, Leeds, UK

Several large clusters of UVsilx buxus topiary trees and mixed underplanting providing both decorative features visible from the shopping mall walkways, and attractive garden settings on the roof areas below the glazed domes.

The more than 120 teardrop-shaped trees varied from 0.6 to 2.2 metres tall. Their cores were produced using our inhouse CADCAM facilities, with completion from design to delivery in less than a month.
